Civil Service Superannuation Pension

This is a “defined benefit” pension plan

Employees contribute a percentage of earnings to the plan and accrue a pension. Employers also fund a portion of the benefits earned

The pension is determined using a formula that uses **service** and **earnings**. Your pension amount does not directly depend on what you contributed

3

3

Pension Depends on Service

Qualifying Service

- Used to determine benefit eligibility
 - Early Retirement/Rule of 80
 - Disability Pension
 - Pre-retirement Survivor Benefits
- Generally measured from start date to end date
- Unbroken unless there’s been a suspension of more than 54 consecutive weeks

Pensionable Service

- Used to determine the pension payable
- Actual service on which contributions are made
- May be able to be enhanced by purchasing service or by transferring service from another pension plan (if eligible)

Pension Depends on Earnings

The pension formula uses an average of your highest five years throughout your career.

The salary used to determine your average are your regular earnings as provided by your employer.

Pensionable earnings include:

- retroactive salary adjustments,
- banked vacation days cashed out at retirement,
- "deemed" salary while receiving disability benefits (depending on your employer).

Pensionable earnings exclude:

- earnings while working under contract
- overtime
- severance pay

15

15

Service and Earnings

Increasing these variables will increase your pension

Pensionable Earnings:

- Cashing out banked vacation days
- Increase regular salary

Pensionable Service:

- Purchase/transfer service
- If your pensionable service is lower than qualifying service, you may be eligible to purchase service.

16

CSSB Pension and Life Insurance Pre-Retirement Seminar – January 2024

16

Increasing Pensionable Earnings: Vacation Days

- A lump sum payment for vacation is subject to pension contributions (8% or 9%). Gross vacation earnings can be included in pensionable salary when you cease to be an employee.
- Limited to the amount of vacation days earned in the last two years and an overall maximum of 50 days.
- This can increase pensionable salary in the final year, which usually increases pension benefits, often by 4 or 5%.
- Check with your employer about banking and cashing out your vacation days and to get an estimate of vacation days earned in your last two years.
